Description

Introduction to ECD and Crank Storyboard. A basic user interface application will be developed using Crank Storyboard for a PHD50 that can be used as an example for continued development.

Topics

- ECD product range overview
- Crank Storyboard development interface and concept
- Introduction to Lua Scripting
- Interactive application build, including:
 - Animations
 - Digital Inputs
 - Analog Inputs
 - Outputs
 - Analog Video
 - Persistent Data Storage
 - J1939 Messaging
- PC simulation of application
- PHD / Embedded UI Best Practices

Objectives

Build an understanding of user interface development with respect to the PHD.
