## Geared Servo Axis in a Low Cost, Compact Package.

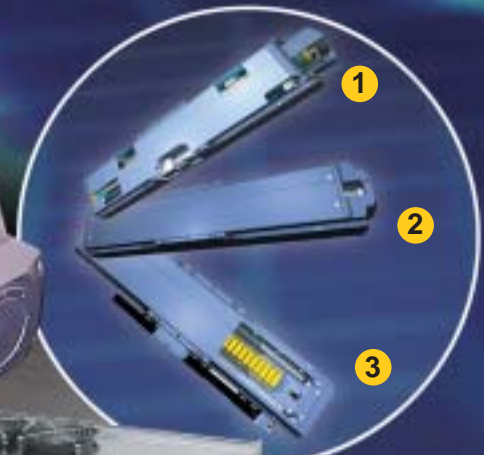

**Stealth® Gearmotor**  
Helical Planetary Gearbox with high efficiency brushless servo motor optimized for peak performance and engineered to offer 30% more value.

**i-Drive® Servo Amplifier**  
A full featured intelligent drive using advanced semiconductor hybrid packaging technology to deliver 1.5KW of power in a rugged and potted casing. Easy to use graphical software can get you up and running in minutes.

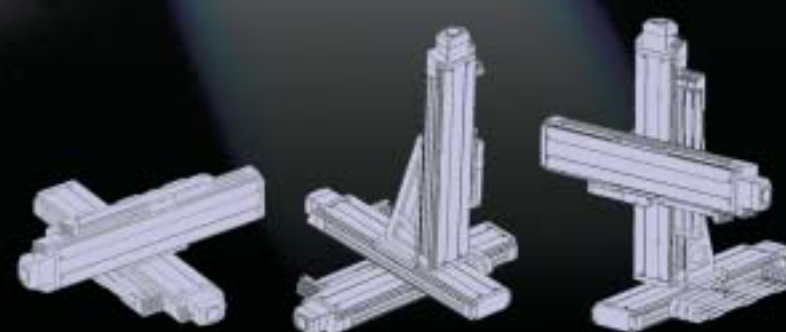

**Motor and Encoder** in one compact package eliminates extra parts, improving reliability and performance.

**Stealth® Helical Planetary Output** provides high torques, low backlash and quiet, reliable performance.

## Precision Linear Stages with Modular Designs to Meet Any Challenge.

**Luge LM® Linear Module**  
A full line of Linear stages featuring integrated ballscrew or linear motor drives designed to reconfigure for multi-axis modularity. Combined with Bayside's other motion elements, such as the patented Z Wedge or Ultra Precision Rotary table, the Luge LM can be the platform of any precision machine.

- 1 Direct Drive Integral Motor
- 2 Flanged Mount Motor
- 3 Direct Drive Linear Motor
