

# Stealth Planetary Gearmotors & *i-Drive* Technology

**Tightly Coupled Integration!**

**Stealth Planetary Gearmotors** - a complete integration of helical planetary gearheads with brushless servomotors. This exciting innovation offers the following benefits:

- lower cost
- smaller package
- more reliable
- higher performance

The ***i-Drive*** is a state of the art digital amplifier with power ratings from 0.5 to 1.5 Kw. The drive may be configured for torque, velocity and closed loop position control of synchronous and asynchronous motors.
